EXPERIENCE

Senior Consultant

Jun 2025 – Present

Heartland Community Network, Bloomington, US

- Contributed technical expertise to the implementation of a Community Data Insights Platform, a multi-sector application designed to provide data-driven intelligence by tracking trends in areas like Food Security, Health and Education.
- Designed and implemented the core SQL data structures and data ingestion pipeline for the platform, defining API contracts and validating cleaned datasets to ensure data integrity and scalable access for community reporting.
- Developed high-performance, responsive modules in Next.js and React for key sector dashboards, leveraging virtualized lists and memoization to decrease load times from 10 seconds to under 2 seconds.
- Built sector-level dashboards using Power BI, transforming raw SQL tables into interactive visual reports that enabled community partners to analyze trends and access insights instantly.

Software Engineer

May 2024 – Aug 2024

Datamaxx, Florida, US

- Contributed to the Omnixx Enterprise product, a high-availability public safety software used by law enforcement agencies to share and access mission-critical data securely.
- Optimized complex C# backend logic and rewrote resource-intensive SQL queries and stored procedures in SSMS, utilizing profiling tools to eliminate performance bottlenecks and reduce latency on data-heavy screens.
- Refactored heavy legacy components using HTML, CSS, JavaScript, and jQuery, which reduced rendering overhead and improved page responsiveness, resulting in 30-40% faster page load times.

Systems Engineer

Sep 2021 – Jul 2023

Infosys, Bengaluru, India

- Contributed to a major digital transformation initiative within the retail and e-commerce domain, focusing on ensuring high availability for order and pricing via robust Spring Boot backend services.
- Led the migration of monolithic legacy modules into Microservices utilizing Java and Spring Boot, implementing event-driven communication via Kafka to decouple services and reduce deployment failure rates by 40%.
- Optimized high-latency RESTful APIs using Spring Boot, applying connection pooling and caching strategies, and fine-tuning MySQL queries to reduce response times for read-heavy inventory operations from 10 seconds to under 3 seconds.
- Ensured code quality and system reliability by designing and implementing JUnit unit and integration tests with Mockito, achieving a target of 90% code coverage and preventing critical regressions.
- Implemented continuous integration and delivery (CI/CD) pipelines using Jenkins and Docker for containerization, ensuring automated testing and reliable, production-ready releases.

SKILLS

Languages: Java, JavaScript, TypeScript, Python, SQL, HTML5, CSS3

Backend & Microservices: ASP.NET Core, Entity Framework Core, Blazor, Spring Boot, Spring MVC, Microservices, Kafka

Databases: SQL Server (SSMS), MySQL, PostgreSQL, Oracle, MongoDB, T-SQL, SSIS

Testing & QA: xUnit, MSTest, Moq, Unit Testing, Debugging, Performance Optimization

Cloud & DevOps: Azure DevOps, Docker, Jenkins, Kubernetes, AWS (S3, Lambda)

Tools & Collaboration: Git, JIRA, Postman, VS Code, Maven, CI/CD Pipelines, Code Reviews

EDUCATION

Florida State University

Tallahassee, FL

Master of Science in Computer Science

Aug 2023 – May 2025

Visvesvaraya Technological University

Bangalore, India

Bachelor of Engineering in Computer Science

Aug 2017 – Aug 2021
